

Step 2

I am following up the recent **numeracy** and **literacy** assessments. Your results suggest we may need to put additional strategies in place for you. This may mean extra tutorials, or it may mean looking at another programme initially, such as those offered through the School of Foundation Learning.

We would like to meet with you to discuss these results and your options on **Wednesday at 9am** - please come to the School's reception area. Present will be ******* Head of School, Kitty Keogh from Student Support Services and myself**. You are most welcome to bring a support person with you should you wish to.

Please be assured we have your best interests as our focus.

Kind regards

Step 3-4

Hi folks

As we explained when introducing the recent reading and numeracy evaluations, we are following up students who were identified at Step 3-4, to offer some additional tutorials.

*The first one is a reading/ study skills tutorial on **Tuesday March 29th from 2-3pm in Room H206a**. The tutorial will include getting familiar with the text book - layout and text features, reading/ study tips, identifying main ideas, checking for comprehension etc. Bring along your **Bioscience** text book, as we will be using this.*

***Helen Lindsay, from the Learning Centre**, and I will be jointly running this tutorial.*

Regards

Hello

Just to let you know that we have scheduled another numeracy tutorial for those who wish to attend - personally I think it is a good thing for everyone.

The two **Helens** will be in the class on **Wednesday the 6th of April at 3pm.**

Please take advantage of this great opportunity before we start drug calculations for anaesthesia.
